

Waiting For The Night

Örlygur Smári / Hera Björk & Peter Fenner

Shadows wake me in the morning
And my eyes shut out the light
Make believe you're near me
To bring you back each day
I close my eyes and pray

I'm waiting for the night to fall
For images to float around my mind
I'm waiting for the night to fall
To dream in ev'ry colour I can find

All the light and shade
Like photographs that fade
I'm waiting for the night to fall
To dream my dream of you

Dreams are unforgotten stories
Silent movies in the night
Feels like history repeating
To bring back what we had
I need your love so bad

I'm waiting for the night to fall
For images to float around my mind
I'm waiting for the night to fall
To dream in ev'ry colour I can find

I'm waiting for the night to fall
For images to float around my mind
I'm waiting for the night to fall
To dream in ev'ry colour I can find

All the light and shade
Like photographs that fade
I'm waiting for the night to fall
To dream my dream of you
